

911inform is the only all-encompassing notification system that provides real-time communication through SMS text and email to on-site staff and first responders. Using our easy-to-use mass notification tools, we allow administration to send a variety of notifications instantly to faculty, parents, students, or additional members of the community. Our cloud-based web application allows administrators to instantly blast notifications out or schedule them for a future time, and even save messages for re-use. 911inform makes large-scale communication within your school community easy and efficient.
