ABOUT 911INFORM

At 911inform, our mission is to **Simplify Safety**. As a single-pane-of-glass emergency management system, 911inform provides the situational awareness, command, and control to effectively handle any crisis. 911inform's bi-directional communication systems and security integrations notify emergency personnel about the exact who, what, where, and when of any crisis, and provide responders and on-site personnel temporary command and control of the situation. All of this is accomplished with no software, no logins, and no apps, making 911inform the definitive partner in any emergency.

CHANGING THE PARADIGM

SAFETY SIMPLIFIED™

THE CHALLENGE FACING SCHOOL DISTRICTS

More Software, LESS Control:

- Everyone is throwing MORE software at emergency management for schools.
- Schools need 11 different software packages for compliance and emergency management functionality.
- An average medical emergency or active school shooter event is over in eight minutes.
- It is impossible to log in to all of these programs in a short span of an emergency.
- Police and first responders don't want additional logins and software in their PSAP; they want speed and integrated functionality.

SINGLE-PANE-OF-GLASS SOLUTION

- Our solution uses NO apps, NO login and NO additional software or downloads.
- We integrate with all existing infrastructure to provide first responders full situational awareness with command and control to manage a crisis.
- In mid-sized school districts, we're used an average of 10 times per day. From medical emergencies to cafeteria fights to an angry parent, our system builds muscle memory.

School Districts that have deployed 911inform have seen a reduction in average response time to an emergency by **60%**.

INTERACTIVE MAPPING

- Our Patent-Pending Interactive Mapping elevates emergency response capabilities with real-time granular information.
- Provides on-site teams and first responders with complete situational awareness on an emergency.
- Based on floor plans of your buildings and maps of your properties.
- Adds building and property information, including locations of security devices.
- Displays locations of devices that place a 911 call.

With over **300** integrations and counting, 911inform is fully customizable to the needs of any school or organization.

With our technology, we're changing the paradigm in school safety.
