

SIS AND DATA SECURITY

In addition to physical security, data security is paramount to schools and other educational institutions.

911inform is proud to integrate with the leading Student Information Systems (SIS), which are utilized to store and track student information, including their grades, attendance records, contact information, and schedules. These programs are vital to students, parents, and staff, and can be equally vital to first responders in case of emergency to track where students are during the school day.

911inform currently integrates with:

- Realtime
- Genesis
- Powerschool
- OnCourse

Data security is paramount to any district, and 911inform leverages industry-leading, unparalleled security, ensuring your district's confidential data stays safe and secure. Whether utilizing an SIS system or logging in and tracking through traditional means, 911inform keeps your data in one place. To that end, 911inform reinforces SIS security and exceeds certification standards and compliance with all leading cybersecurity frameworks, listed below.

» **Attendance**

» **Check In Students**

» **Missing Students**

» **Reunification**
